Save and reload

The interface provides Save Configuration and Reload controls.

CONFIGURATION VIEW

Adapted from the supplied webpage source. Selected fields and source values shown; values are not recommended tariffs or defaults.

Account identifiers, payment details and password fields are omitted from this catalog view.

Frequently asked questions

Key information for customers and installation partners.

01 What is Msg Master?

A payment and timer controller for massage-chair applications. It brings QR payment, RFID card interaction and session controls onto one front panel.

02 Which payment options are shown?

The demonstration shows a scan-and-pay QR display and an RFID card reader. Confirm the supported payment setup and card type when ordering.

03 How many price selections are available?

There are four front-panel buttons: PRICE-1, PRICE-2, PRICE-3 and PRICE-4. Confirm the required tariff and session-duration configuration for your installation.

04 Can users see the time remaining?

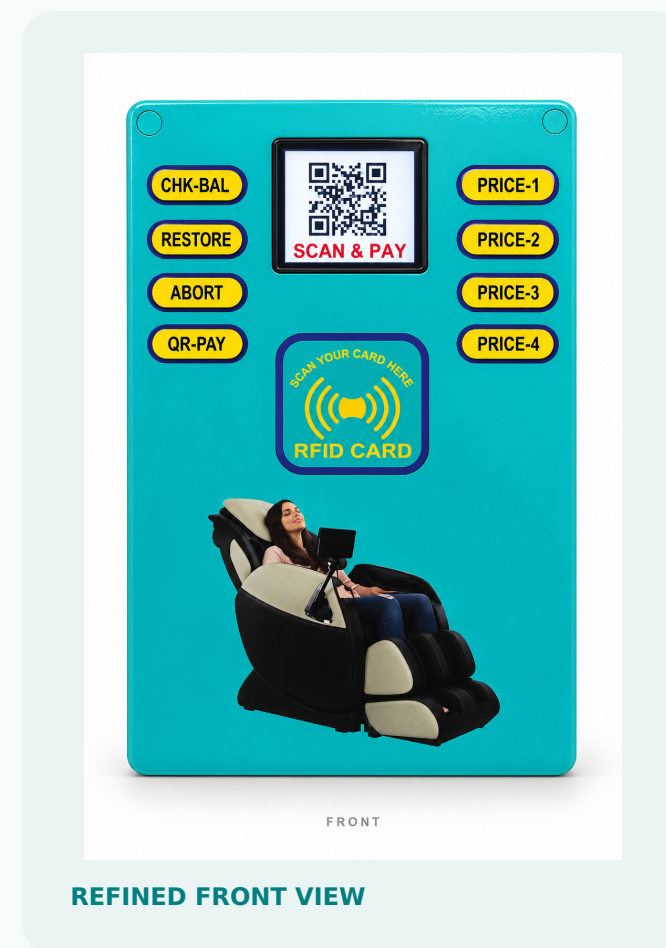

Yes. The display shows a countdown with the remaining session time during operation.

05 What other controls are on the panel?

Dedicated buttons are labelled CHK-BAL, RESTORE, ABORT and QR-PAY. The video also shows an on-screen confirmation sequence for aborting a session.

06 What should I confirm before ordering?

Confirm chair compatibility, power and output ratings, wiring, connectivity, payment setup, pricing and warranty terms with the supplier.

Refined product illustration. Original video images appear in the gallery on the next page.
